**Ultrasound: Abdomen**

HISTORY: History of cirrhosis and Budd-Chiari.

COMPARISON: Abdominal ultrasound dated 31st July 2023

**FINDINGS:**

The liver is nodular in contour with a heterogenous echotexture. No suspicious hepatic mass. No biliary obstruction. The portal vein is patent with normal direction of flow in the main portal vein. Reversal of flow is noted in the left portal vein

The spleen is enlarged measuring 15 cm with renal splenic varices. The gallbladder is not well visualized due to bowel gas shadowing. The gallbladder is edematous measuring 4 mm. No gallstones.

The right kidney measures 12.1 cm and the left kidney measures 10.6 cm in bipolar length. Both are unremarkable in outline and echotexture.

Moderate volume abdominopelvic ascites.

**IMPRESSION:**

Hepatic cirrhosis with portal hypertension. Hepatofugal flow is noted in the left portal vein. Moderate volume ascites
